

URBAN

Sharing data in the digital city

Breakout session

“Emerging matters, innovative approaches”

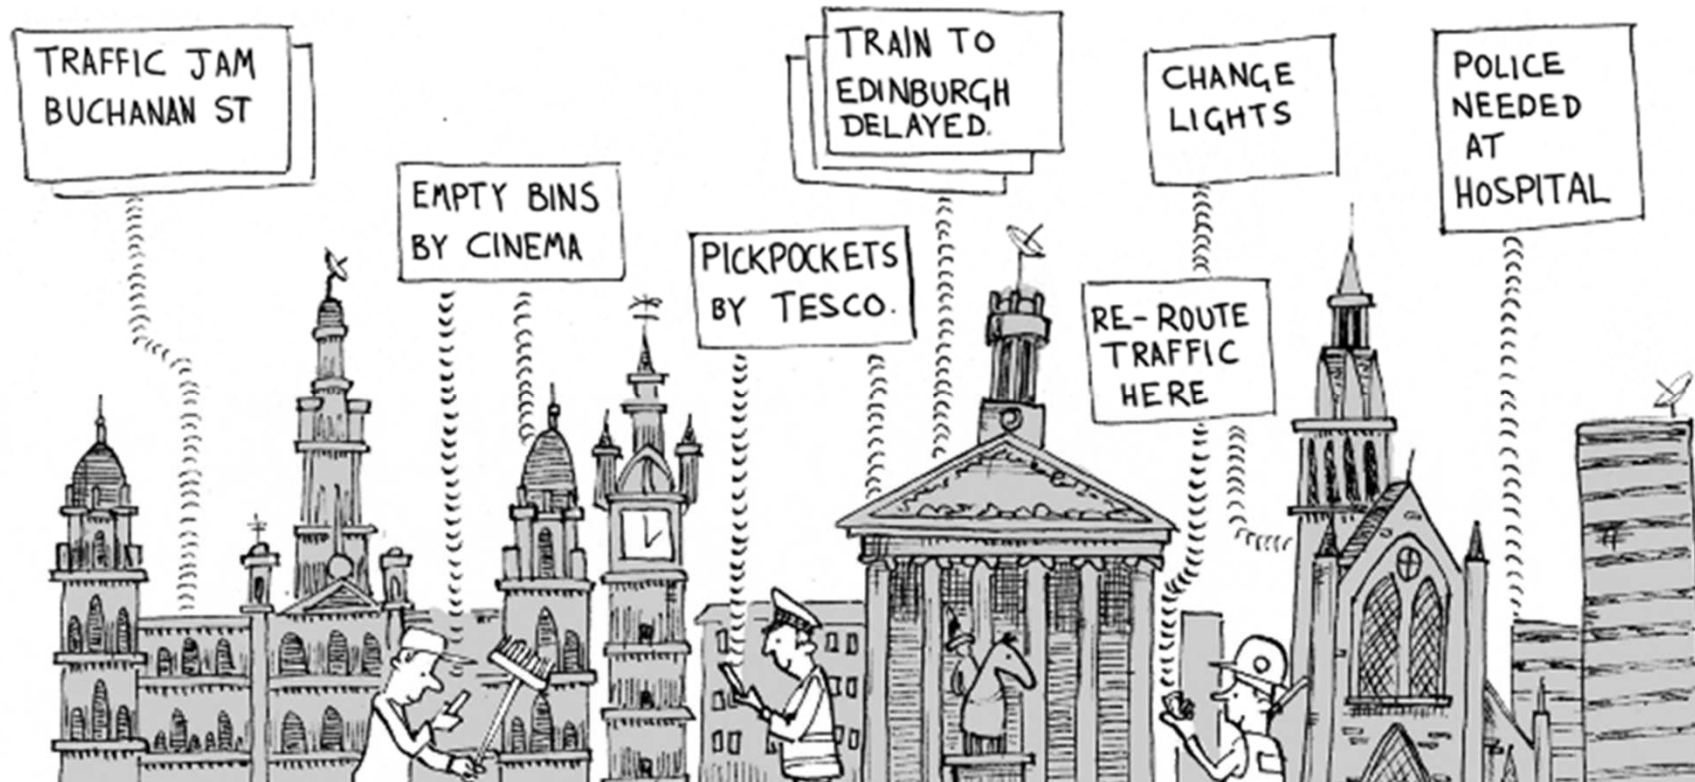

10.04.2014; 14:00-15:00

Global Urban
Competitiveness
Project

URBAN

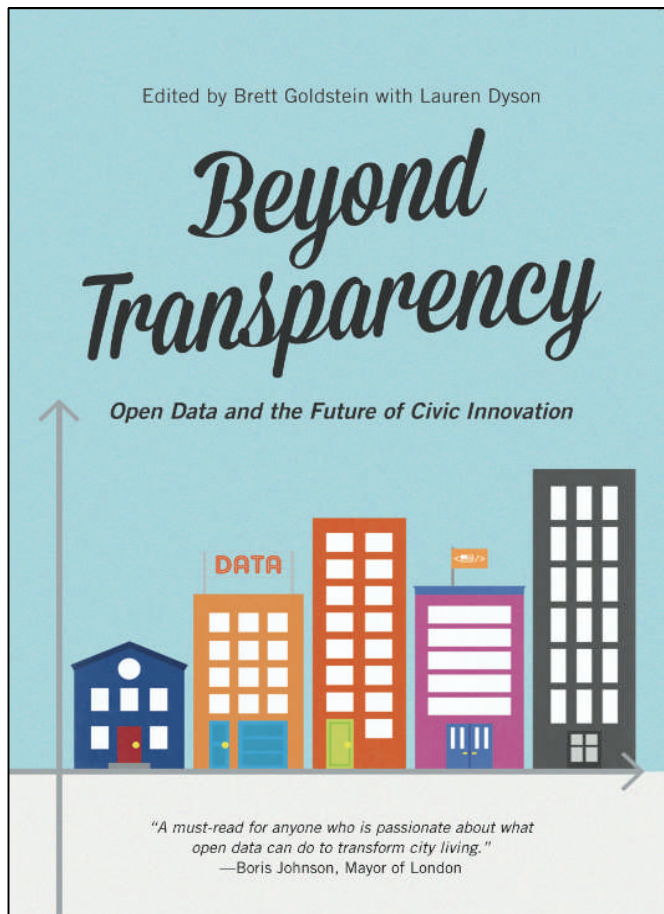

New uses of ITs in cities

Source: Big Data Insight Group

URBAN

Open data in cities

Logic:

- Cities and urban provisions → data
→ wider audiences

Objectives:

- Transparency, accountability and democratic participation
- Innovation and new business opportunities
- Improving urban services

URBAN

Agenda

- **Two leading open data strategies**
 - Dublinked (Deirdre Ní Raghallaigh)
 - Helsinki Region Infoshare (Asta Manninen)
- **Questions & Answers**
- **Discussion**

URBAN

Q and A

URBAN

Some (possible) topics for discussion (challenges ahead)

- Which **type(s) of leadership** are required? Distributed? Among who?
- “**Data is power**”: how to change the “closed data” culture in the Public Administration? Need for **new agile structures/brokers**?
- How to **prioritize** the right data to release?
- What is the right **spatial scale** to start it?
- What can be the **role of the private sector/ IT corporations**?
- How to **involve users and the ordinary citizen**?
- How to **make it grow**?
- How to **finance it**?
